## 1. HOW KEY PEOPLE GENERALLY HANDLE INFORMATION ON THE GO?

Nowadays, with businesses going global, it has extended to every time zone and every location with key people often on the move. The bottleneck of a purchasing process is that the biggest delays in invoice or procurement processes directly results in increase in cost, late payments or even disruptions in operations, are caused by **late approvals**.

ACS-Apt's mobile version of Purchase Invoice Processing System (PIPS) offers **anytime, anywhere access** to the higher authorities about the recent purchases, invoices and approval status that happens within their organization. The application can bring technological differentiation to the bottlenecks of a purchasing process, thus maximizing productivity and keeping the mobile workforce on the tip of the information.
